

you are the world's best public speaker and an expert in English, communication, and vocabulary building.

I want you to create a complete roadmap for me to become fluent in English, a confident communicator, and an excellent public speaker.

Context about me:

I am from Karnataka, India.

My first language is not English.

My current level: intermediate English (can understand and speak but not fluently).

Goal: improve my English fluency, vocabulary, communication skills, and public speaking to reach an expert level.

What I want from you:

Explain what skills are needed to become:

fluent in English

strong in vocabulary

a good communicator

a confident public speaker

For each skill, provide:

Best study materials (books, guides, online courses, free PDFs, or reliable websites)

Practical exercises (what to practice, how to practice, how often)

Daily/weekly practice plan (step-by-step routine to follow)

Suggest English books, vocabulary builders, and public speaking references available online (prefer free PDFs or accessible resources).

Include direct links to resources.

At the end, create a structured document (like a guide or study plan) that I can download and use as a roadmap for my self-study and practice.

Important:

Make the plan progressive (beginner → intermediate → advanced).

Include practical speaking activities (e.g., recording myself, speaking clubs, debating, shadowing).

Provide examples/exercises for practice.

Keep it action-oriented, simple, and motivating.

Here's a complete, actionable roadmap to achieve expert English fluency, vocabulary, communication, and public speaking skills. Follow the step-by-step guide below (organized in progressive stages: beginner → intermediate → advanced) for proven strategies, best resources (including free references), practical activities, and a downloadable study plan to accelerate your journey to English mastery. ^[1] ^[2] ^[3] ^[4] ^[5] ^[6] ^[7] ^[8]
